DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10090333, filed on 10/8/2001.

Specification

The disclosure is objected to because of the following informalities: On page 1 of the specification update the status of the patent application to read as -- now U.S. Patent No. 6,696,652 B1--. Any other errors applicant may become aware of should be corrected.

Appropriate correction is required.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "45" and "455" have both been used to designate the wall thickness in the specification and the drawings respectively.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2832

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Contact maker should be referred to as an actuator. The claim does not clearly describe how the switch per se, activates a drive which opens and closes the movable vehicle part.

The claim does not clearly state if the car body constitutes the primary part, which contains a portion for activating the switch.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by the United Kingdom patent document to Jones. Note the abstract and figures 1 and 2a, 2b.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by WIPO International Publication (473) to Textron Automotive Company. Note the abstract and figures 1-5.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by the German patent document to Bock. Note the abstract and figures 1,3 and column 1, lines 1-50.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Filion et al. Note the abstract and the flexible switching regions in figures 1,2,3,4 and 5.
